Gender equality does not aim to **deny the differences** between the sexes.

Rather, the goal is to eliminate **structural disadvantages** and **discrimination** based on **gender**.

A person's **gender** must not be **decisive** when it comes to access to **possibilities and opportunities** in our society.

Equality makes it possible to have a **fair share** in personal development opportunities - thus it is an **expression of social justice**.

The **Equal Opportunities Officer** and the **staff** of the Equal Opportunities Department...

- are **experts** on questions of gender equality,
- are actively involved in various **working and steering groups** of the city administration, the city society and various network partners,
- **have an impact** through (specialist) events, projects, cooperation and public relations work and **set impulses relevant to gender equality**,
- **advise** employees and citizens of the city of Wolfsburg on gender equality issues and **refer them** to specialised agencies if necessary.
